Jordan T. Romero

Senior Software Engineer · Full Stack + AI Product

Austin, TX · 512-348-0227 · jordan.t.romero@gmail.com · linkedin.com/in/jordan-t-romero · github.com/jordan-romero

SUMMARY

Senior full-stack engineer with 5+ years building product at startups, now shipping AI features end to end at Luster, an AI practice and coaching platform for sales teams. I own work from design session to production flag: TypeScript/React UI, Node and Python services, LLM scoring and Terraform-managed AWS infrastructure. I also bridge engineering and go-to-market, owning release notes, help docs and monthly product training for CS and Sales, and I build the agentic tooling my team uses to plan, review and ship.

EXPERIENCE

Luster

Remote · Jan 2025 – Present

Senior Software Engineer

- Engineering owner for **Adaptive Difficulty V2**: practice difficulty that levels up or down from a rep's last three scorecards across practice calls, skill drills and live calls; scoped it into 13 tickets and built it.
- Built **Skill Drill management** (create, edit, clone, assign, publish) so managers run drills in-app instead of through an internal API workflow, then shipped Skill Drills 1.5 with per-round audio for every customer.
- Delivered **Live Calls for All**: manual transcript upload with an LLM-driven speaker-identification formatter, plus ingestion hardening (fair queuing, per-file queues, separate scoring and ingestion worker pools, resumable uploads).
- Built **Google and Outlook calendar integration** that detects external meetings and links them to prior call history, and Luster's first dialer ingestion through Close CRM.
- Built the interactive **Diagnostics** report (filters, pagination, team and individual PDF downloads, revenue-risk panel) and a skill heatmap for managers.
- Leading **Fact Sheets for Skills** (scoring checks factual and compliance accuracy, citing the transcript line) and the **context graph**, an org-scoped evidence layer feeding Luster's AI features.
- Cleared high-severity security findings ahead of the annual compliance audit and drove a no-PII-in-logs standard across every repo.
- Built the team's **AI-native engineering tooling**: an automated PR-review pipeline, epic planning and ticket-bootstrapping agents, and a shared knowledge base fed from meetings, chat and Jira.
- Own customer and GTM communication for product: monthly release notes, help-center articles, launch emails and the monthly Product Enablement training for CS and Sales; run R&D ceremony scheduling.

Resilia

Remote · Jul 2022 – Dec 2024

Senior Software Engineer

- Built across the full platform with React, TypeScript, Node.js, GraphQL, Prisma, PostgreSQL and Auth0, on microservices running in AWS EKS.
- Key engineer on the **Funder Platform**, letting funders support nonprofit projects, track progress and measure impact; rebuilt the Impact Goals feature.
- Shipped an in-app survey tool, needs assessment, executive dashboard and collaborative goal experience.
- Led the AI and DevEx guilds, bringing LLM tooling (Anthropic, Freeplay) into team workflows and the product.
- Introduced Playwright end-to-end testing and mentored junior developers on code quality and testing.

Knock

Remote · Apr 2021 – Mar 2022

Software Engineer

- Built a consumer dashboard for web and mobile with React and React Native, with real-time data sync and Zustand state management.

- Led the "Guaranteed Offer" product launch, delivering web updates and launch material in two weeks; rebuilt the marketing site for SEO.
- Ran A/B tests on key dashboard features to improve engagement and conversion.

Bluebonnet Trails Community Services Round Rock, TX · Jul 2018 – Mar 2021

Parole Intensive Case Manager

- Supported people with severe and persistent mental health diagnoses through crisis resolution and coaching; led agency-wide trainings on rapport building.

PROJECTS

- **Hearth**: a Discord bot and Next.js web app that gives a D&D campaign a memory you can talk to, with a permission filter so each player only sees what their character knows. TypeScript, Turborepo, Supabase + pgvector, Prisma, Claude agents, live transcription.
- **ActingAccents.com** (freelance, founding engineer): landing page and an online dialect course built on the International Phonetic Alphabet. Next.js, TypeScript, Supabase, Prisma, Vercel.

SKILLS

Languages TypeScript, JavaScript, Python, SQL, HTML/CSS

Frontend React, Next.js, React Native, TanStack Query, Material UI, Storybook

Backend Node.js, Express, GraphQL, REST, Prisma, PostgreSQL, DynamoDB, Supabase

AI LLM scoring and extraction, agentic workflows, MCP servers, Claude and OpenAI APIs, ElevenLabs, Deepgram

Infra & quality AWS (Lambda, Step Functions, S3, EKS), Terraform, Docker, GitHub Actions, Vercel, Datadog, Playwright, Jest, LaunchDarkly

EDUCATION

Flatiron School · Software Engineering Immersive 2020

Southwestern University · Bachelor's Degree 2012
